PREFACE.

ALL the Works included in the BIBLIOTHECA LONDINENSIS will be found in the "London Catalogue of Books published in Great Britain during the Years 1841—46, arranged in One Alphabet, containing their Sizes, Prices, and Publishers' Names."

It is hardly necessary, in a preface, to say much of a work of this kind, as it in a great measure speaks for itself. The want of some work that would give a *complete list of the books published on particular subjects, without wading through a general catalogue*, has been long complained of; and at the repeated solicitations of those who were daily experiencing the inconvenience, the present volume was undertaken.

The labour and research necessary to bring this book through the press can only be known to those who are accustomed to pursuits connected with bibliography. Errors it is wholly impossible to avoid. The classification of thirty-six thousand books, ranging over a period of thirty years, cannot possibly be accomplished without immense care. However, although it is not expected that any catalogue can be complete, it may be permitted here to state that the delay in publishing the BIBLIOTHECA LONDINENSIS has been solely occasioned by the desire to make it as perfect as possible in repeatedly examining the different divisions of classification.

This book contains a great amount of information; and, however imperfectly the task of compiling it is accomplished, there is no doubt that, to every one connected with literature, it will save much valuable time in searching after all the works written by different authors on the same subjects; whilst to those who buy books, it shows them at one glance the selection they can make, without being subject, from an imperfect memory, to purchase what is subsequently found useless.

The design of this work is new, and was suggested in consequence of many persons referring to the "London Catalogue" being unable to find out the books required. They knew perhaps the title of the book, but not the name

of the author; but this difficulty is now in a great measure removed, and it is presumed that the BIBLIOTHECA LONDINENSIS will be found at least a valuable assistant, if not a *rade mecum*, to those whose pleasure or business it may be to consult its pages.

In addition to the Classification of Divisions, a copious table of reference to the leading subjects will be found at the end; and facing page 1 is a notice which explains the plan of the work.

THOMAS HODGSON.

ALDINE CHAMBERS, PATERNOSTER ROW.

JULY, 1848.

NOTICE.

THE words in *Italic* indicate the first word of the line in the London Catalogue of Books. When there is no *Italic* in the line, the first word in the BIBLIOTHECA LONDINENSIS is the same as in the London Catalogue.

The cross references in the work, when printed in SMALL CAPITALS, point to a different division of classification; but when printed in the usual manner, they apply to another part of the same division or alphabet.

The General Table of Reference is placed at the end of the book.

NOW READY, IN SVO, CLOTH LETTERED, PRICE 28s,

THE
LONDON CATALOGUE OF BOOKS,
WITH THEIR SIZES, PRICES, AND PUBLISHERS' NAMES, THOROUGHLY
REVISED AND CORRECTED, FROM 1814 TO 1846.

“ ‘The London Catalogue of Books,’ a work of great utility to Students, and to all admirers of literature, has just been published by Mr. Hodgson, of Paternoster Row. It is a catalogue of all works published in Great Britain from 1814 to 1846, with their sizes, prices, and publishers’ names. It has been compiled with great diligence, and at an immense expense. Its value for reference will at once be understood, when we say that it contains the names of nearly 40,000 publications, so classified and arranged that any particular work can be instantly picked out. For all persons at all engaged in literary pursuits, or desirous to complete or make additions to a library, this excellent catalogue will prove as useful as ‘The London Directory’ is found to the merchant,” &c.—*Britannia*.

BENT’S LITERARY ADVERTISER,
Register of Books, Engravings, &c.

EXCLUSIVELY DEVOTED TO LITERATURE AND THE FINE ARTS.

Published on the 10th day of every month, price 7*d* stamped, and 6*d* unstamped; or annual subscription, 8*s*, *including* the Supplement, or Catalogue of all the New Books and New Editions published during the year.

CONTENTS :—Advertisements of New Books, New Editions, Books in the Press, Works on the Fine Arts, Miscellaneous Advertisements relating to all branches of Literary Property, &c., &c. A correct List is given of all the New Books and New Editions that are published in this Kingdom, with their Sizes and Prices. And a List of the New French Works.

THIS PERIODICAL has now been established forty-six years, and was the first organ of Publishers in announcing their productions to the Trade, the Public, &c. In producing monthly a list of those books that are published from month to month, immense care and research are necessary in compiling a correct one.

The LONDON CATALOGUE OF BOOKS has naturally its existence from this source, and it is not necessary to enumerate the advantages of a work of that description—they are too well known.

The Editor, therefore, takes this opportunity of recommending AUTHORS, PUBLISHERS, &c., to send announcements of their works for insertion in BENT’S LITERARY ADVERTISER, as it insures them a correct description in the LONDON CATALOGUE OF BOOKS.

London : Published by THOMAS HODGSON, Aldine Chambers, Paternoster Row,
and, by order, of all Booksellers and Newsmen.

BIBLES, TESTAMENTS, PSALTERS, PRAYER BOOKS, LEXICONS, CONCORDANCES, ETC.,
